

## ***World leaders in innovative biomaterials***

---

AdvanSource Biomaterials (ASB) is committed to providing advanced material science technology with superior quality and product consistency to meet the medical device industry's requirements.

Through our applicationally focused biomaterials, targeted material synthesis, second source alternative materials and the expansion of our secondary operations, ASB has gained worldwide recognition as a leading supplier of medical grade polymers.

Our product offerings span the durometer range from 5 Shore A to 75 Shore D and include polycarbonate-based urethanes and ether-based elastomers, thermoplastic silicone polycarbonate urethanes, liquid polymers, extrudable & solution-based hydrophilic materials and a full line of antimicrobial products.

In addition to our core materials, our technical services include custom solutions, prototype coating capabilities and homogeneous colorant technologies.

ASB – creating world class biomaterials for the medical device community.
